

90 x 180 x 17 mm
Dimensions: width x height x depth

BSV2012 Video is the innovation of the basic models from sks in the video sector

Description

The BSV2012 video allows an optimal operability for all age groups. Below the display are three capacitive concave shaped buttons for call acceptance, door opening and call deactivation.

The functions such as the selection of a ringtone, its volume as well as contrast and brightness of the display are set via the menu of the user-friendly touch screen.

With an installation depth of only 17 mm and the glossy white surface the BSV2012 video hands free version discreetly fits into any living environment.

The deliberate renunciation on mechanical elements allows a long-life span as well as an easy, hygienic cleaning.

Technical specification

- SKS BUS technology
