

135 x 135 x 17 mm
All measurements: width x height x depth

The VICO is equipped with a big 5" touch display that is automatically activated when a door call comes in showing a high resolution video image from the door station. Additionally to that the door call is signalled optically and acoustically. Excellent and clear transmission of speech as well as the privacy function during an active door call go without saying.

The three keys of the VICO are designed in a vanishing print, so that they can only be seen in the innovative glass surface when they are actually needed, i. e. when the user activates the indoor station by touching it or if a door call comes in. Therefore it is possible to create a minimalistic and clear structure that impresses.

All other functions, such as settings of the automatic door opener function, ringtones, ringtone volume, color, contrast and brightness or opening the image storage (optional, only in connection with a media coupler 300102) are made in the intuitive and clearly structured menu. Here the resident can choose German or English as the menu language.

Item no.	Description	Color
100074	VICO video, hands-free, 6-wire, real glass surface	white
100075	VICO video, hands-free, 6-wire, real glass surface	black

Features

- SKS 6-wire BUS technology
- Real glass surface
- Capacitive tactile sensor for accepting calls, opening doors and muting (ringtone is automatically reactivated after the chosen time span, after a maximum of 24 hours)
- Further settings like changing the ringtone volume or ringtone melody, color, contrast and brightness settings are done via the 5" touch display
- Optical signalling of calls by illuminated sensor keys
- Automatic door opener function
- One-man installation and programming
- Optionally parallel operation of up to 3 indoor stations
- Key functions in the menu are password protected, so they can not be changed unintentionally
- „Vanishing print“: Keys appear automatically when a door call comes in or the display is touched
- All in all 12 ringtone melodies for door, floor and internal calls
- Ringtone volume adjustable
- Menu language in German or English
- Hands-free operation
- Audio and video privacy function
- Internal call function
- Optional image memory function (usage is only possible in connection with media coupler 300102)
- Automatic storage of the configuration in external memory chip (on terminal)
- Installation on FM- or inwall box
